DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Dutta et al (Dutta), Johnson and Dujardin et al (Dujardin).

Each of the references show the capability of performing a n-taps and an m-tap polyphase filtering (Dutta, Figs. 7A and &B, Johnson, Figs. 1 and 4 and Dujardin, Figs 1 and 2) wherein the filtering unit receive in parallel data and coefficients form a memory and the results are fed to the memory. Relative to the claimed “crossbar” note the switching in Dutta, the commutator in Johnson and data reorganization block in Dujardin.

3. Claims 3 and 4 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must be in the alternative, not cumulative.

Drawings

4. Figs. 1 and 2 are required to be labeled “Prior Art”.
